# Witness the True to Life Colors

Our highest CRI rating yet – V-TAC's new generation of CRI>95 spotlights & bulbs is a must in commercial lighting.

A CRI of 85 to 90 percent is considered good at color rendering, while a CRI of 90 percent or above is considered excellent. A CRI index of 90 or above should be used for tasks requiring the most accurate color discrimination.

A red apple appears red because it reflects red wavelengths, but absorbs others.But not all white light sources have the same amount of red wavelength light. As a result, under different light sources, a red apple can reflect different amounts of red light, changing its appearance.

- Outstandingly engineered to show only the truest of colors
- Emphasize vivid colors to increase appeal of any product to its consumers and contribute to purchasing decisions
- Recommended for restaurants, apparel shops, supermarkets, and other retail areas
